

Book Tutorial Page 3

By Jane Tregenza

All artwork, images, instructions and design is copyrighted 2012

A very special page on our children and/or grandchildren. If you don't have children you could use baby photos of yourself and your siblings. I am hoping one day to add more tags for my grandchildren. I am planning on getting an up to date photo of my five children to go under my frame on the left side of my page.

IDS0538

Please follow the instructions carefully. Read each instruction to the end, before cutting. Lots of the papers are used on the tag as well as for your page, so you need to cut them the way I describe or you will run out of paper! All chipboard has been sprayed white. All papers have had their edges inked using Colorbox Liquid Chalk ink – Chestnut Roan.

Please note, I am only human and do make mistakes, I have taken every care while writing the instructions, and hope they make sense. It is quite hard to write instructions as I know what I mean; but this does not always translate into the instructions. If you are unable to work something out, then please ask a question in the comments box at the end of the post and I will answer it for you as best I can. Or email me at jane@seriouslyscrapbooking.net.au

Materials List

Little Darlings Collection

2x Lullaby

1 x New Arrival

Once upon a Springtime Die Cut Frames

3x Black Cardstock and 2 Yellow, + 1 of each of Pink and blue cardstock

Imaginarium Designs Chipboard – IDC0002 Swirl corners.

White Brads and assorted Ribbons

Color Box Fluid Chalk-chestnut roan,

1x Little Treasures

1/2 x Rock-A-Bye

1 x Baby Borders

1/2x Cherished

3L 12x12 Adhesive sheets

Wet Glue

The instructions for creating your 3rd page.

DSC0443

Before we start the page, we need to cut some borders from our “Baby Border” print paper. Please cut the borders as shown above. We need 8 strips in total. Don’t cut all the strips into pieces, as we need the bottom one to be 4 borders wide.

DSC0449

Have a good look at the back of your sheet of “Lullaby” print paper. It has a border all the way around the print. The top left and right corners of the print paper has a fancy corner printed on it. We are going to use these fancy corners from both sheets. Now look at the border. It is in from the edge of your print paper, this gives us a nice creamy edge. We are going to remove the borders from each sheet. I need you to cut each border piece one at a time using a craft knife and a ruler. Place your ruler on the inside edge of your border, but leave a little bit of the cream on it. Cut all four sides, making sure you don’t cut through the fancy corners at the top.

DSC0452

Once you have cut all four sides, you can cut across each corner and remove the middle of your print paper. Do this to each print paper. The middle bit is what we will be using for our pages. Separate the corners from the borders.

DSC0462

Because we removed the borders the print paper is now about the right height for our page. So now all we need to do is cut it to the right width. Put the first piece in your trimmer in the right way up, so you can read the writing. Cut it to 9 ¼ inches wide.

DSC0465

For the second sheet of print paper, we need to put the print into our trimmer upside down. The images will need to be upside down. Trim it back to 8 ¼ wide.

IDS0472

You need to completely cover the back of both pieces of Lullaby Print Papers with adhesive. You can use double sided adhesive paper or tape, if you use tape make sure you butt it together with no gaps in between each piece.

DSC0474

Adhere the 9 ¼ inch wide piece to your black foundation page first. Try and have the same amount of black showing along the top and bottom on your page. Remember this print paper is one inch wider, so it will go over the join on your foundation page onto the other page. You should have tape on your foundation page to help adhere your print paper over the join. Don't worry if your print paper is not on straight. You are going to add a border around the page.

DSC0475

Carefully fold your page over, use your finger to run along the seam as you fold the page up and over. This will create a fold that you can see and use to line up your second piece.

DSC0478

Now you need to adhere your 8 ¼ inch piece. Make sure you are away from the centre fold of your page or you page will not shut nicely. To make it easier for yourself, don't remove all the backing from your adhesive paper or tape. Just take a little strip off. Then if you don't quite line it up right you can lift it off and try again.

DSC0476

Carefully fold your page over, use your finger to run along the seam as you fold the page up and over. Fold the whole page over and run your hand firmly along the fold to set the crease.

DSC0446

Find your sheet of "New Arrival". We need to cut it so that we have lots of pieces to use on our page, pocket and tags. Use the photo as a guide. You need to cut all the pieces as follows. You need to have, one piece two stamps wide and 8 stamps long. Plus the three images from the middle, and the two pieces, above and below the images. You also need another piece, 6 stamps wide and 3 stamps high. Keep all the left over pieces, as we still need to cut some extra pieces for our tags.

DSC0369

Now you are going to make the pocket. From your sheet of yellow cardstock, cut two rectangles 5 ¾ inches x 8 inches. We only need one for the pocket; once the pocket is finished you will be adhering the second one to the back to cover all the brads. From your sheet of "Little treasures", cut a piece 5 ½ inches x 7 ¾ inches. Cut the 5 ½ inches first then cut the piece back to 7 ¾ inches. Ink around the edges and adhere it to your piece of yellow cardstock. You should have a little bit of yellow showing at the left end and at the top of your yellow rectangle, don't worry about having any yellow showing at the bottom or if you have too much at the right end. We will be hiding the right end and the bottom with a border.

Cut a second piece from your "Little Treasures" to 4 ½ x 7 inches. Adhere it to your pocket about ½ inches in from the left and ½ inch down from the top. From your sheet of "Baby Borders" find the strip that has the cute little baby faces on it. Cut it so you have 7 faces and add it to your pocket about 3 inches down from the top of your pocket. Save the leftover piece of baby border, you will need it for a tag.

DSC0368

Choose one of the images from your sheet of "New Arrival". Cut a piece of yellow cardstock, 3 ½ inches wide x 3 1/8 inches high. Adhered your image to the middle of the yellow mat. Cut another mat from your blue cardstock, it needs to be 3 ¾ inches wide x 3 ½ inches high.

DSC0398

Adhere the image to your pocket; use the photo as a guide. Add two white brads and a title to finish the pocket. Add your second yellow rectangle to the back of your pocket.

DSC0482

Now we need to place our pocket onto our page. It is to be a pocket with the left and top edge **not** attached to your page. You will need to put tape on your foundation page, so the pocket is attached to the page on the right and bottom side and corner of your page only. Use the photo as a guide. Please don't worry about the right side of your page yet!

IDC0454

This border is done slightly different to our first and second page, so please read the instructions carefully. You need to sort your borders out. Some have the pattern running all one way and the some have the pattern changing direction in the middle. We need four pieces with the pattern running the same way. These need to be used at the top and bottom of our page. The ones that change direction, we need to use two of them, one for each side of our page. We will be starting in the bottom left corner of our page, then doing the bottom right corner. Next will be the top and lastly the sides.

DSC0485

We will not be doing a mitred corner for this page. Trim the left edge of your border so it is straight. Start that the bottom of your page and at the left edge. You need to be just in from the left edge of the page and just up from the bottom. We need to have a little bit of black showing at the bottom and side of your page. Adhere the first strip on your page, and run it across your page over the join and onto your pocket. It needs to go across the page and onto the pocket about an inch. Place the second strip on your page, start in the bottom right corner of your page and run it across your pocket and over the top of the other border. Trim it back so it is not near the fold on your

page. Adhere the strip to your page.

Now you can adhere your border at the top of your page. Start in the left corner. Adhere your border and run it over the join in the middle of your page. Go over the fold in the middle of your page for about an inch. Place the other border on your page and trim it to fit. It needs to go over the top of the first border and finish near the fold in the middle of your page. It must not go over the fold. Once you have it trimmed, you can adhered it to your page.

DSC0487

Now you can do the left edge page border and the right edge page border. They can overlap the top or bottom borders in the corners. Trim each end to fit and adhere it to your page.

DSC0492

Your corners should look like this.

DSC0495

Find your four corners and trim them back to match the photo above. Glue them to your page; try to match up the corners with the borders. They need to meet on the outer edges. Don't worry if they don't quite match as we are going to add some chipboard corners.

DSC0498

Your page should now look like this. All the borders on and corners glued on as well.

DSC0500

Now it is time to do work on the left side of your page. Find your piece of "New Arrival" that is two stamps wide and 6 stamps high. Mat it onto a piece of blue cardstock. Adhere it to your page.

Find your piece of "New Arrival" that is 6 stamps wide and 3 stamps high. Turn it over and adhere it to your page.

DSC0505

From your sheet of "Once upon a Springtime" die cut frames, remove the largest frame. Punch out the middle bit and keep it for your tags. Place a photo under it the frame and add it to your page. Add a chipboard title to the bottom of the frame.

DSC0535

To finish your page add four chipboard corners.
Now we are done, and now we can start the Tags.
